Re: Post-Traumatic Stress Disorder in Asia: The Importance of Timely Diagnosis and Treatment

Dear Editor:

Please find enclosed above-mentioned manuscript, by Sunil Wimalawansa for the consideration for publication in the AJMS.

We believe that this review would add a new dimension to an important, but neglected clinical and scientific area in Asia. It would add further understanding of multiple and novel mechanisms adding a different scope and perspective to the management of PTSD. We believe this report would appeal to the readership of AJMS and beyond into other fields in medicine. Please address all correspondence to: suniljw@hotmail.com

I confirm that this manuscript has not been published elsewhere and is not under consideration by another journal. Author has no conflict of interest.

I look forward to receiving referees and editorial comments

Yours Sincerely,

Sunil Wimalawansa

Sunil J. Wimalawansa, M.D., Ph.D., FACP, M.B.A., DSc.
