

Editorial

It is our great pleasure to state that the fifth volume of *The Himalayan Physics*, is now with our readers. The publication is a joint effort of Nepal Physical Society, Western Chapter and Department of Physics, Prithvi Narayan Campus, Pokhara. It aims at publishing research papers & short popular articles containing new results, ideas and concepts along with experimental methods and theoretical treatments by the scholars in the field of Physics and other related areas. We hope the contents in this issue will interest the specialists as well as common people.

The valuable contribution to this volume from all enthusiastic writers from both home and abroad are highly appreciated. However, we could not include all of the received articles. We look forward to receiving creative suggestions from the readers so that we can launch improved volumes in the future.

The editorial board offers thanks to Ozone Offset Press for its efficient work. We are thankful to Prof. Dr. Binil Aryal, Head, Central Department of Physics, Kirtipur, Prof. Dr. Jeevan Jyoti Nakarmi, President, Nepal Physical Society, Surya Bahadur G.C., Program Co-ordinator, M.Sc. Physics, P.N. Campus, Pokhara and all the colleagues in the department and members of the society of Western Chapter for their kind support and co-operation. We would like to extend our sincere gratitude to all the authors and referees of this issue. We would also like to extend sincere thanks to the P N Campus authority and other institutions for their encouragement and support.
