

## MESSAGE

Dear Readers,

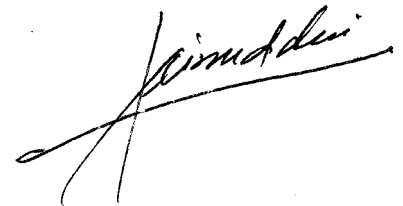

Greetings!

National Medical College is a private Medical College which came in existence in 2001 AD despite several obstacles. We worked day to night to make this as an established institution and one of the largest private Medical College and Teaching Hospital of Nepal. NMC is committed to produce competent medical doctors and provide quality healthcare services and we succeeded in this direction. However, we lagged in terms of research and publications in the form of 'Journal'.

Today, I feel proud to announce that after untiring efforts of the editorial team especially Chief Executive Editor, we finally succeeded to launch the inaugural issue of 'MED PHOENIX' 2016. MED PHOENIX is a peer reviewed international medical journal published by National Medical College, Birgunj, Nepal.

As an Editor-in-Chief of the journal, I would like to assure you that I won't compromise in the quality of journal. I hope you will enjoy reading the papers and have great learning and updates in medical education and practice.

*With thanks*

**Prof. (Dr) Jainuddin Ansari**  
Editor-in-Chief
